STATEMENT OF WORK
INSTALLATION OF THE PRIMARY POWER MANAGEMENT SYSTEM (PPMS) ON THE HEMTT A2 & HEMTT A4 Vehicles

C.1. General Scope of Task Order: The contractor shall provide engineering, design analysis, manufacturing, installation, and test support for the integration and installation of the Primary Power Management System (PPMS) (Attachment 002) into two HEMTT A2s and one HEMTT A4 vehicles. The vehicles will be provided to the contractor as Government Furnished Equipment (GFE) under this contract. Additionally, the contractor will be required to provide engineering and materials support services for First Article Test (FAT) for each of the vehicles. Upon successful completion of FATs, the contractor will prepare engineering documentation to support possible future Engineering Change Proposals (ECP) incorporating the PPMS into the technical drawing packages for both vehicles. The Government will provide a copy of the performance specification on a CD and sent via mail.

C.1.2 Background: The PPMS was developed for vehicle "power" systems utilizing batteries designed for maximum energy delivery, Ultra Capacitors for the vehicle starting requirements, improved energy efficient starter motor, solar panels to maintain charge in the system, and a power management device to monitor state of health of the system and maximize component life. The intent of this project will be transfer that technology into the HEMTT A2 and A4 vehicles and validate the PPMS for proper operation in these vehicles.

C.2-C.5 Requirements

C.2. Phase I: The contractor shall develop a project plan, to include cost and schedule information, to develop an integration package for installation of the PPMS (Attachment 002) into the HEMTT A2 vehicles. The plan, at a minimum, shall address the design of the integration hardware necessary to support the installation of the PPMS into the HEMTT A2 and identify any changes to the computer code that are required to accommodate the vehicle configuration.

C.2.1 Deliverable: Within 90 days of contract award the contractor shall develop a plan, to include cost and schedule information, for the integration of the PPMS (Attachment 002) into the HEMTT A2 vehicle in accordance with CDRL A001.

C.2.2 Acceptance Criteria: The project plan shall be clear, concise, have detailed cost estimates and a projected timeline to develop materials necessary to integrate the PPMS into the vehicle as well as identify any changes necessary to the computer code to accommodate the HEMTT A2 system design.

C.3. Phase II (OPTION 1): The contractor shall install the PPMS on two GFE HEMTT A2s to support a FAT for validation of the PPMS integration. A draft FAT plan is attached for reference as Attachment 001 in Section J. Additionally, the contractor shall support the FAT of the vehicles produced in this phase of the contract. Support shall consist of vehicle parts support as well as on-call engineering support required to complete the testing. Upon successful completion of testing, the contractor will be required to prepare and deliver engineering documentation necessary to support the development of an Engineering Change Proposal for the integration of the PPMS into the HEMTT A2 vehicles.

C.3.1 Deliverable: Two GFE HEMTT A2s will be provided as GFE. The contractor shall incorporate the Government approved PPMS integration from Phase I for FAT as identified above. The delivery date will be in accordance with the schedule approved (by the Contracting Officer, or Contracting Officer Representative) in Phase I. The contractor shall also provide a Failure Analysis and Corrective Action Report (FACAR) in accordance with CDRL A002 as appropriate. Upon successful completion of testing, the contractor shall prepare and deliver engineering documentation necessary to support the development of an Engineering Change Proposal for the integration of the PPMS into the HEMTT A2 vehicles in accordance with CDRL A003.

C.3.2 Acceptance Criteria: The report shall contain a detailed description of any failures that occur during testing as well as a description of all actions necessary to correct the failures as required by CDRL A003. Engineering documentation will at a minimum include commercial format installation drawings, installation instructions, and electrical schematics.

C.4. Phase III: The contractor shall develop a project plan, to include cost and schedule information, to develop an integration package for installation of the PPMS (Attachment 002) into the HEMTT A4 vehicles. The plan, at a minimum, shall address the design of the integration hardware necessary to support the installation of the PPMS into the HEMTT A4 and identify any changes to the computer code that are required to accommodate the vehicle configuration.

C.4.1 Deliverable: Within 180 days of contract award the contractor shall develop a plan, to include cost and schedule information, to integrate the PPMS (Attachment 002) into the HEMTT A4 vehicle in accordance with CDRL A001.

C.4.2 Acceptance Criteria: The project plan shall be clear, concise, have detailed cost estimates, and a projected timeline to develop materials necessary to integrate the PPMS into the vehicle as well as identify any changes necessary to the computer code to accommodate the HEMTT A4 system design.

C.5. Phase IV (OPTION 2): The contractor shall install the PPMS on one GFE HEMTT A4 to support a FAT for validation of the PPMS integration. A draft FAT plan is attached for reference as Attachment 001 in Section J. Additionally, the contractor shall support the FAT of the vehicles produced in this phase of the contract. Support shall consist of vehicle parts support as well as on-call

I-84 52.222-39 NOTIFICATION OF EMPLOYEE RIGHTS CONCERNING PAYMENT OF UNION DUES OR DEC/2004
FEES

(a) Definition. As used in this clause--

United States means the 50 States, the District of Columbia, Puerto Rico, the Northern Mariana Islands, American Samoa, Guam, the U.S. Virgin Islands, and Wake Island.

(b) Except as provided in paragraph (e) of this clause, during the term of this contract, the Contractor shall post a notice, in the form of a poster, informing employees of their rights concerning union membership and payment of union dues and fees, in conspicuous places in and about all its plants and offices, including all places where notices to employees are customarily posted. The notice shall include the following information (except that the information pertaining to National Labor Relations Board shall not be included in notices posted in the plants or offices of carriers subject to the Railway Labor Act, as amended (45 U.S.C. 151-188)).

Notice to Employees

Under Federal law, employees cannot be required to join a union or maintain membership in a union in order to retain their jobs. Under certain conditions, the law permits a union and an employer to enter into a union-security agreement requiring employees to pay uniform periodic dues and initiation fees. However, employees who are not union members can object to the use of their payments for certain purposes and can only be required to pay their share of union costs relating to collective bargaining, contract administration, and grievance adjustment.

If you do not want to pay that portion of dues or fees used to support activities not related to collective bargaining, contract administration, or grievance adjustment, you are entitled to an appropriate reduction in your payment. If you believe that you have been required to pay dues or fees used in part to support activities not related to collective bargaining, contract administration, or grievance adjustment, you may be entitled to a refund and to an appropriate reduction in future payments.

For further information concerning your rights, you may wish to contact the National Labor Relations Board (NLRB) either at one of its Regional offices or at the following address or toll free number:

(2) Directly requires the use of CIODS means that the Government's specification or technical data package, at any tier, explicitly requires the use of any Class I Ozone-Depleting Substance (CIODS) in performance of the contract.

(3) Indirectly requires the use of CIODS means that the Government's specification or technical data package, while not explicitly requiring the use of any CIODS, does require a feature that you can meet or produce only by the use of CIODS.

(b) Per Section 326 of Public Law 102-484, the Department of Defense cannot award any contract that directly or indirectly requires the use of CIODS unless (i) the use of such substances is essential for contract performance, and (ii) no suitable substitute for the CIODS currently is available.

(c) Before releasing this solicitation, we conducted a best effort review of its technical requirements, standards, and specifications, to see if any contain requirements for CIODS. If we identified any such CIODS requirements, they are identified in subparagraph (d)(1) below.

(1) In addition, to help TACOM meet its obligations under Public Law 102-484, we ask you for input. If you have any special knowledge about any CIODS requirements that our specifications impose, whether directly or indirectly, or if you know about potential substitutes for any CIODS required by our specifications, we would appreciate the information.

(2) It should be understood that you are not obligated to give us the information requested by this provision, and that we cannot provide any separate or special payment for doing so. However, we are asking only for information based on knowledge that is readily available to you as a supplier in this industry. We do not expect you to do any review of our specifications more extensive than the one you perform in order to develop your price.

(d) Please summarize your own review of our specification/technical data package, by completing the following:

(1) During our review of the specification or technical data package in this solicitation, we--

- ☐ have
- ☐ have not

found any direct requirements to use any CIODS. (If have is checked above, offerors are asked to identify, on the following lines, (i) any specifications and standards not already listed immediately below that directly require the use of CIODS; (ii) the CIODS required by the listed specifications and standards; and (iii) whether any substitutes are known to be available for the listed CIODS.)

<u>Spec/Standard</u>	<u>Required CIODS</u>	<u>Substitute Available?</u>

(2) Further, in our review of the specification or technical data package in this solicitation, we--

- ☐ have
- ☐ have not

found any indirect requirements to use any CIODS. (Offerors who check have above are asked to identify, on the following lines, (i) the specifications and standards for this acquisition that indirectly require the use of CIODS; (ii) the CIODS indirectly required by each listed specification and standard; and (iii) whether any substitutes are known to be available for the listed CIODS.)

<u>Spec/Standard</u>	<u>Required CIODS</u>	<u>Substitute Available?</u>

(e) Offerors who check have in paragraphs (d)(1) or (2) above also are requested to say whether substitutes are known to be available for any of the CIODS. If an available substitute would perform less well than the CIODS would perform, please let us know what the technical trade-offs are to the extent that you have such information available.

Name of Offeror or Contractor:

(f) If you checked have in paragraphs (d)(1) or (2) above, and also indicated that substitutes for CIODS are available, we need to know whether use of the suggested substitute would have any effect on your proposed price. If your proposal price for compliance with our current specifications differs from what your price would be if the substitute for CIODS were required, we ask that you let us know what the difference would be in Section B of this solicitation, by giving us two prices or offers:

--One price/offer, labeled with CIODS, will be the offered price in the event that CIODS are used.

--The second price/offer, labeled without CIODS, will be the price offered if substitutes for CIODS are used, and will specify the substitute(s) being proposed for use.

(g) Section 326 of Public Law 102-484 reflects the national and international interest in minimizing the use of CIODS. For this reason, TACOM reserves the right to (i) determine the suitability of substitutes for CIODS when such potential substitutes are available; and (ii) change the specification in any contract awarded as a result of this solicitation, to require the use of suitable substitutes in lieu of CIODS.

L-11 52.237-10 IDENTIFICATION OF UNCOMPENSATED OVERTIME OCT/1997

(a) Definitions. As used in this provision--

(1) Uncompensated overtime means the hours worked without additional compensation in excess of an average of 40 hours per week by direct charge employees who are exempt from the Fair Labor Standards Act. Compensated personal absences, such as holidays, vacations, and sick leave shall be included in the normal work week for purposes of computing uncompensated overtime hours.

(2) Uncompensated overtime rate is the rate which results from multiplying the hourly rate for a 40 hour work week by 40, and then dividing by the proposed hours per week. For example, 45 hours proposed on a 40 hour work week basis at \$20.00 would be converted to an uncompensated overtime rate of \$17.78 per hour. (\$20 X 40) divided by 45 = \$17.78.

(b) For any proposed hours against which an uncompensated overtime rate is applied, the offeror shall identify in its proposal the hours in excess of an average of 40 hours per week, by labor category, at the same level of detail as compensated hours, and the uncompensated overtime rate per hour, whether at the prime or subcontract level. This includes uncompensated overtime hours that are in indirect cost pools for personnel whose regular hours are normally charged direct.

(c) The offeror's accounting practices used to estimate uncompensated overtime must be consistent with its cost accounting practices used to accumulate and report uncompensated overtime hours.

(d) Proposals that include unrealistically low labor rates, or which do not otherwise demonstrate cost realism, will be considered in a risk assessment and evaluated for award in accordance with that assessment.

L-15 52.217-4004 DESTINATIONS FOR OPTION QUANTITIES
 (TACOM)

FEB/1994

To compute a price for any option quantity, assume you'll be shipping a proportional share of the option quantity to each destination scheduled to receive shipments of the same item under the basic contract. For example, if the basic contract involves one third of the quantity to go to destination X, and two thirds to destination Y, assume those same percentages will apply to any option quantities the Government will exercise.

SECTION M - EVALUATION FACTORS FOR AWARD

	<u>Regulatory Cite</u>	<u>Title</u>	<u>Date</u>
M-1	52.217-5	EVALUATION OF OPTIONS	JUL/1990
M-2	52.217-4003 (TACOM)	EVALUATION OF INCOMPLETE OPTION PRICING	FEB/1998

(a) Per FAR 17.203(d), offerors may price the option CLIN in this solicitation incrementally, by entering different option unit prices that will apply to different subquantities or quantity ranges (in the event that the Government elects to exercise less than 100% of the option). Notwithstanding this fact, the provision entitled EVALUATION OF OPTIONS (FAR 52.217-5, located elsewhere in this Section M) indicates that the Government's evaluation for contract award will include each offeror's price for 100% of the option quantity.

(b) In light of the above, if an offeror specifies unit prices that apply to one or more option quantity ranges, but does not specify a unit price for 100% of the option, we will evaluate that offer for award as follows. The option price for such offer shall be deemed to be the higher of (i) the unit price that applies to the basic (non-option) quantity, or (ii) the highest unit price that is identified against any range or subquantity of the option CLIN.
